

BUILD STUDIOS

Build Studios - Built Environment Careers Enrichment Programme

Endorsements and supporting statements

'The enrichment programme with Build Studios has enabled South Bank students to strengthen their careers knowledge and pathways - students were able to interact with and showcase their work to professionals, whilst also strengthening links to core curriculum subjects'

Nick Bentley, Careers Enrichment lead, Oasis Academy Southbank

'The built environment careers enrichment programme has provided great joy to our pupils in a very challenging year. They have got so much out of it – from practical skills to inspiration about their future careers.'

Jamie Thomas, Built Environment careers teacher, Oasis Academy Southbank

'Changing our towns and cities for the better starts with knowing how to make change. By introducing a diverse group of young people to careers in the sector and giving them an understanding of how spaces are designed and made, we can start to make positive change for the cities of tomorrow.'

Helen Santer, Chief Executive, Build Studios

'Making time and space for young people to learn about design and use their imaginations is a priority for us at School for Creative Thinkers. Learning about how architects and planners make an impact and influence our environments helps children understand the value of creative thinking in helping to solve big, global issues whatever career path they take.'

Melissa Woolford, Founder and Director, Museum of Architecture and School for Creative Thinkers

'I would want to do this enrichment again because it's enjoyable doing activities similar to the jobs we are learning.'

Oasis Academy Southbank, Year 7 pupil
