

MERIDIAN WATER

Meridian Water is Enfield Council’s ambitious £6bn regeneration project seeking to bring forward over 10,000 homes and 6,000 jobs that will benefit the local communities.

Together with developer partners Vistry, LBE are inspiring and upskilling the next generation of city-shapers in pursuing a career in the built environment. By learning skills and getting industry-recognised accreditations and by being exposed to the diversity of careers in the construction sector from a young age, the partnership enables and empowers residents to choose a career in construction and transform the city they live in. LBE is running an ongoing outreach programme seeking to inspire and engage local residents to participate in the transformation of Meridian Water.
